Workshop Development Cohort

- Barbara Wigglesworth, CPC, CPMA, CDEO, CRC, CCS, CHC
- Greg Langan, DHSc, LSW, MPH
- Heidi Smith, CPC, CRC
- Jennifer Blake, M.S.Ed., CPC, CPMA
- Susan Holzberg

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Learning Objectives

- Analyze current clinical documentation for growth opportunities including new billing pathways established by CMS in CY 2025.
- Develop a framework for implementing a new service line within your clinical department and assess for sustainability
- Formulate a team strategy to accurately map clinical effort into clinical revenue through value capture.

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Disclaimer

- Clinical Practice Location:
  - Southern New Jersey Region (close to the Philadelphia region)
  - Fee for Services; No shared Risk Care Model
  - Large Subspeciality Clinic at an Academic Medical Center
  - None of our primary locations are at a FQHC or have a rural medicine designation

- Please ensure regional clinical applicability and local payer policy before integrating the CPT or E/M Codes highlighted in this workshop.
- Focus of this discussion is Ambulatory Outpatient Clinical Care

AMERICAN SOCIETY OF ADDICTION MEDICINE

Evaluation and Management: Coding by MDM

- MDM split into three elements:
  - Number and complexity of problems addressed
  - Amount and Complexity of Data Analyzed and Reviewed
  - Risk of Complications and/or Morbidity/Mortality of Patient Management (a/k/a "Risk")
- Each category has 4 levels corresponding to 9920x/9921x
- To qualify, documentation must reflect ≥ 2 of 3 elements for that level

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Straightforward Level MDM: 99203/99213

Elements of Medical Decision Making			
Level of MDM	**Number and Complexity of Problems Addressed at the Encounter**	**Amount and/or Complexity of Data to be Reviewed + Analyzed** ***Each unique test, order, or document contributes to the combination of 2 or combination of 3 in Category 1 below.**	**Risk of Complications and/or Morbidity or Mortality of Patient Management**
Straightforward	**Minimal** • 1 self-limited or minor problem	**Minimal or none**	**Minimal risk of morbidity from additional diagnostic testing or treatment**
Low	**Low** • 2 or more self-limited or minor problems; **OR** • 1 stable chronic illness; **OR** • 1 acute, uncomplicated illness or injury **OR** • 1 stable acute illness **OR** • 1 acute, uncomplicated illness or injury requiring hospital inpatient or observation level of care	**Limited** *(Must meet the requirements of at least 1 of the 2 categories)* **Category 1: Tests and documents** • Any combination of 2 from the following: • Review of prior external note(s) from each unique source; • Review of the result(s) of each unique test; • Ordering of each unique test **OR** **Category 2: Assessment requiring an independent historian(s)** (For the categories of independent interpretation of tests and discussion of management or test interpretation, see moderate or high)	**Low risk of morbidity from additional diagnostic testing or treatment** Examples only: • Over-the-counter drugs • Minor surgery with no identified risk factors • Physical therapy • Occupational therapy • IV fluids without additives

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Moderate level MDM: 99204/99214

Elements of Medical Decision Making			
Level of MDM	**Number and Complexity of Problems Addressed at the Encounter**	**Amount and/or Complexity of Data to be Reviewed + Analyzed** *Each unique test, order, or document contributes to the combination of 2 or combination of 3 in Category 1 below.	**Risk of Complications and/or Morbidity or Mortality of Patient Management**
Moderate	**Moderate** • 1 or more chronic illnesses with exacerbation, progression, or side effects of treatment; OR • 2 or more stable chronic illnesses; OR • 1 undiagnosed new problem with uncertain prognosis; OR • 1 acute illness with systemic symptoms; OR • 1 acute complicated injury	**Moderate** *(Must meet the requirements of at least 1 out of 3 categories)* **Category 1: Tests, documents, or independent historian(s)** • Any combination of 3 from the following: • Review of prior external note(s) from each unique source; • Review of the result(s) of each unique test; • Ordering of each unique test; • Assessment requiring an independent historian(s) OR **Category 2: Independent interpretation of tests** • Independent interpretation of a test performed by another physician/ other qualified health care professional (not separately reported); OR **Category 3: Discussion of management or test interpretation** • Discussion of management or test interpretation with external physician/other qualified health care professional/appropriate source (not separately reported)	**Moderate risk of morbidity from additional diagnostic testing or treatment** Examples only: • Prescription drug management • IV fluids with additives • Therapeutic nuclear medicine • Decision regarding minor surgery with identified patient or procedure risk factors • Decision regarding elective major surgery without identified patient or procedure risk factors • Closed treatment of fracture or dislocation without manipulation • Diagnosis or treatment significantly limited by social determinants of health

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

High level MDM: 99205/99215

Elements of Medical Decision Making			
Level of MDM	**Number and Complexity of Problems Addressed at the Encounter**	**Amount and/or Complexity of Data to be Reviewed + Analyzed** *Each unique test, order, or document contributes to the combination of 2 or combination of 3 in Category 1 below.	**Risk of Complications and/or Morbidity or Mortality of Patient Management**
High	**High** • 1 or more chronic illnesses with severe exacerbation, progression, or side effects of treatment; OR • 1 acute or chronic illness or injury that poses a threat to life or bodily function	**Extensive** *(Must meet the requirements of at least 2 out of 3 categories)* **Category 1: Tests, documents, or independent historian(s)** • Any combination of 3 from the following: • Review of prior external note(s) from each unique source; • Review of the result(s) of each unique test; • Ordering of each unique test; • Assessment requiring an independent historian(s) OR **Category 2: Independent interpretation of tests** • Independent interpretation of a test performed by another physician/other qualified health care professional (not separately reported); OR **Category 3: Discussion of management or test interpretation** • Discussion of management or test interpretation with external physician/other qualified health care professional/appropriate source (not separately reported)	**High risk of morbidity from additional diagnostic testing or treatment** Examples only: • Drug therapy requiring intensive monitoring for toxicity • Decision regarding elective major surgery with identified patient or procedure risk factors • Decision regarding emergency major surgery • Decision regarding hospitalization or escalation of hospital-level care • Decision not to resuscitate or to de-escalate care because of poor prognosis • Decision regarding parenteral controlled substances

Activity 1: Note Review

In groups at your table, look at the following clinical note and answer the following questions:

1) What is the level of service for this visit and why?
2) Has there been any separate billable CPT services documented in this clinical note? What were those CPT services?

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Activity 1: Enhanced Note

Activity 2: Effort Mapping

The following slide has a list of activities that was performed during the clinical care of patient:

- In your groups, talk about how you would categorize all the activities and what CPT codes/procedures would be applicable?

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Activity 2: Effort Mapping

In-office LAIB injection

Smoking Cessation Counselling

Calling patient with Lab Result

Completion of Prior Authorization

Teaching Physician Trainees

Harm Reduction Counselling

Screening for Sexual Transmitted Infections

Notable AM CPT Codes

- G2211
- In Office Injection Administration 96372
- Smoking Cessation – 99406/99407
- Depression Screening - 96127
- Teaching Physician Trainee – GC modifier
- Modifier 25 Code
- Interprofessional Consultation Code
- Telehealth – telehealth.hhs.gov

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Combining CPT + E/M Codes

- Key principle: Documentation should include the details to support the 2 separate services on the same date of service.
- Examples:
  - Smoking cessation counselling + Nicotine use disorder management
  - Buprenorphine injection and opioid use disorder management
- For services that involve time, document separate time appropriately

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Interprofessional Consultation

- **Opportunity:** You can bill for completing an addiction consultation about a patient's care without the patient present
- **Payor:** Rules vary by payor; Medicare uses G-codes; Commercial and Medicaid use CPT equivalents.
- **Compensation:** The requesting/treating physician can also bill for time preparing for the consultation
- **Strict Requirements:** Advanced consent from patient, a written report of consult, no face-to-face visit with the patient within 14 days of consultation.

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Telehealth Billing and Coding

- **DEA Extension:** The ability to prescribe buprenorphine via telehealth is extended through 12/31/2027
- **Medicare:** Behavioral telehealth requires an in-person visit within 6 months prior, then annually.
- **Billing:** Place of Service (POS) modifiers impact reimbursement—please confirm with individual payors their requirements
- **Documentation:** should include Pt consent, location of the patient (state and location type), and who is present with the patient.

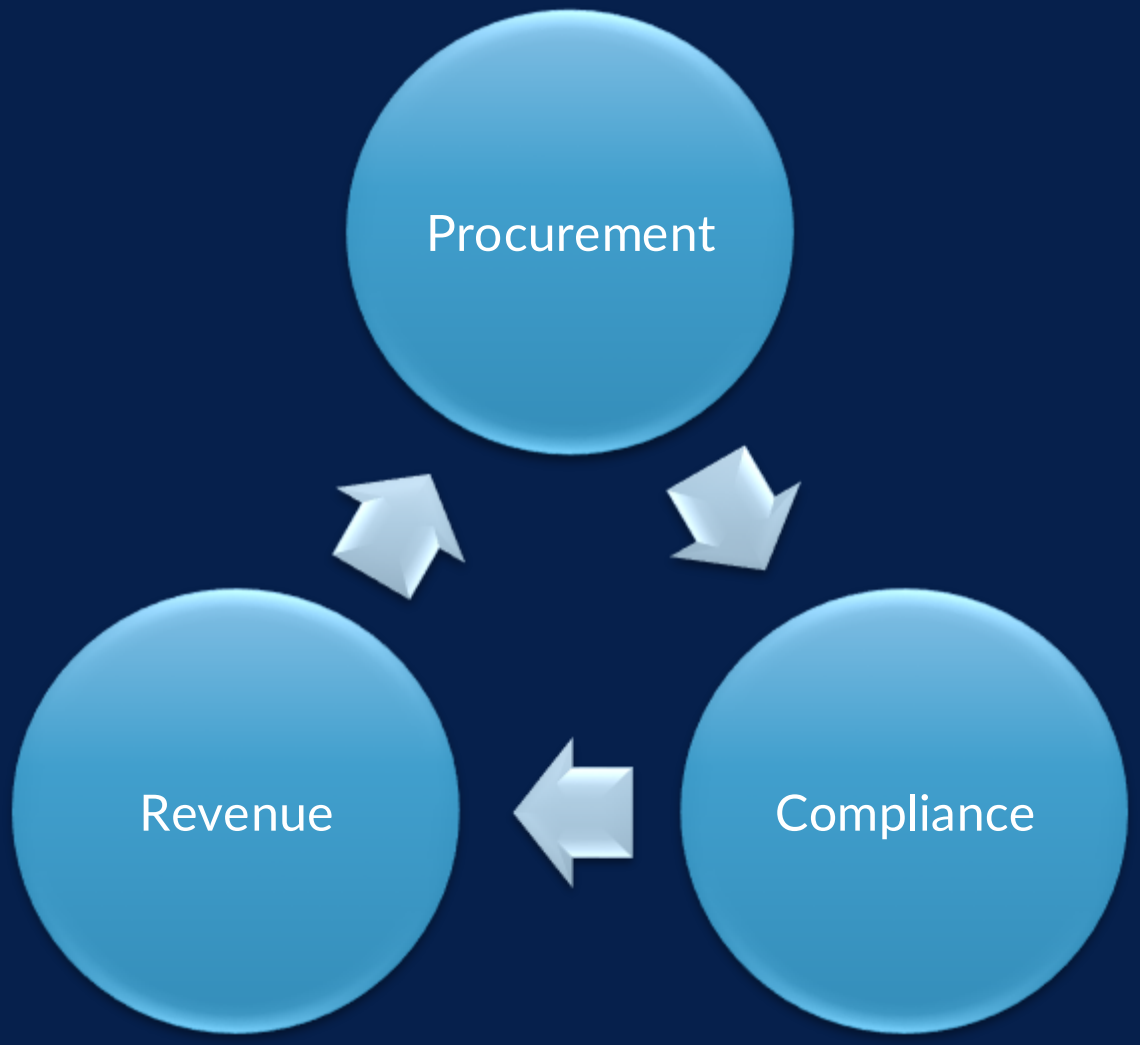
Building a New Clinical Service Line



AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Regional Reimbursement Rates

- NJ
- California
- Alabama
- Texas
- Ohio
- Colorado
- CPT included: Telehealth, IPC, Smoking Cessation, IM/SQ Admin

Activity 3: Case Presentation

- Case 1: In a large muti-disiciplinary group setting (including Pharmacy, Behavioral Therapist, and health navigation services) you complete patient visits for the participants. During one visit you administer their buprenorphine injection, complete tobacco cessation counselling, and collect and interpret a PH9 assessment.
- What services can you bill for in this clinical situation? How would you think about documentation.

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Case Presentation

- Case 2: You receive a call from a primary care colleague who is caring for a patient with sedative hypnotic use disorder who has not been evaluated by you in the last 7 days. During the conversation you were able to review the patient's chart, Prescription monitoring database, and the last set of urine toxicology prior to providing a written clinical recommendation.
- What services can you bill for during this visit? Would this change if you determine the patient needs to be seen in person at your addiction medicine clinic?

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Case Presentation

- Case 3: You are seeing a patient in your low access bridge clinic and perform a standard E/M service for their unstable, opioid use disorder during this visit. On chart review, you notice that the patient has a buprenorphine injection available to be administered by one of your practice partners who is working at the long-term addiction clinic close by and the patient heads there and get their injection.
- Can both providers bill for their various clinical services delivered during this date of service? How would one think through documenting and billing in this scenario

AMERICAN SOCIETY OF ADDICTION MEDICINE
FOUNDED 1954
ASAM

Final Takeaways/Summary

- Thoughtfully exploring and refining clinical documentation can be a tool for supporting sustainable clinical practice.
- Multidisciplinary partnerships are key for realizing new service lines and ensuring their long-term viability
- You already do so much awesome work! It is possible to capture that value add from major payors through an intentional coding strategy.
